EDUCATION

Universidad Politecnica de Tlaxcala
Student of Mechatronic Engineering at UPTx 2020 - 2023

Britney Palma

UI / UX DEVELOPER

EXPERIENCE

Neufeld | 2022-2023

The Neufeld company has helped me to develop my talent and professional skills as the design and programming, by increasing my eager to learn. Currently I'm developing Web applications with React JS and Vue JS with collaborative challenges and projects that take place in a remote work culture, using agile practices like SCRUM, and Kanban.

ParkUp | 2023

As a *freelance* mobile app developer, I had the opportunity to collaborate on an exciting project for the "ParkUp" app. Where I could continue to test my design skills to meet customer expectations.

Sferea| 2023

In my current position in Sferea, I am part of a highly specialized team in the development of cutting-edge mobile applications. My continuous work in the company has allowed me to continue contributing significantly in the creation of innovative technological solutions that positively impact the user experience and the achievement of business objectives.
